

CrazyDomains Domain instructions PDF

To change the A record at Crazy Domains:

1. Go to <http://www.crazydomains.com.au/>
2. Log in to your Crazy Domains Account

3. Click *Domains*

4. Under Manage Domains - Click the domain name you want to have applied to your Redframe site.

The screenshot shows the 'My Account' dashboard with a navigation bar at the top containing various services like Domains, Web Hosting, Email, Servers, etc. The 'Manage Domains' section is active, displaying a table of domains. The first domain, which is a .com.au domain, is highlighted with a red box. The table has columns for Domain, Expiry, Status, and Addons.

Domain	Expiry	Status	Addons
[Redacted] .com.au	Jan 2017	Registered	[Icons]
[Redacted] .com	7 Feb 17	Registered	[Icons]

4. Scroll down to DNS Service for Nameservers and Click *Modify* for the regular domain name. Enter in ns1.ifp3.com 209.80.10.168 for Name Server 1 and ns2.ifp3.com 209.80.10.169 for Name server 2 and click UPDATE

The screenshot shows the 'Name Servers' configuration page. It has a table with two rows for Name Server 1 and Name Server 2. The input fields for the domain names and IP addresses are highlighted with a red box. Below the table are buttons for '+ Add Name Server', 'Cancel', and 'Update' (which is also highlighted with a red box).

Name Server	Domain	IP Address	Action
Name Server 1	ns1.ifp3.com	209.80.10.168	Delete
Name Server 2	ns2.ifp3.com	209.80.10.169	Delete

+ Add Name Server Cancel Update

5. **Notify Support that the changes have been made via the support ticket in your Admin.**
