

MyDomain.com Nameserver Instructions PDF

To change the Nameservers at Domain.com :

1. Go to <https://www.mydomain.com>
2. Log in to your MyDomain.com Account

The screenshot shows the MyDomain.com website header with the logo and navigation menu. Below the header is the Customer Login section. It features two input fields: 'Username or Domain' and 'Password'. A red arrow points to the 'Username or Domain' field. Another red arrow points to the 'Password' field. A third red arrow points to the 'Log In' button. Below the input fields is a link for 'Forgot Username or Password?'. At the bottom of the login section, there is a link for 'Don't have an account? Sign up now!'. To the right of the login form, there are two promotional banners: 'Marketplace Browse our and service' and 'Affiliate Program Refer customers for free!'.

3. Click *Domain Central*

The screenshot shows the MyDomain.com dashboard. It is divided into three main sections: 'EMAIL', 'DOMAIN', and 'GOOGLE TOOLS'. The 'EMAIL' section contains icons for MailCentral, WebMail, Change Catch-All, and Manage Spam Filter. The 'DOMAIN' section contains icons for DomainCentral, Register Domain, and Registrar Transfer. A red box highlights the DomainCentral icon, and a red arrow points to it from the 'Log In' button in the previous screenshot. The 'GOOGLE TOOLS' section is currently empty.

4. On the next page, click 'Update Nameservers', then click 'yes' I understand. Enter *ns1.ifp3.com* for Primary Nameserver and *ns2.ifp3.com* for Secondary Nameserver. Finally click the 'Set Nameservers for Selected Domains' button
